

VARUN RAVAL

Walldorf / Heidelberg / St. Leon-Rot, Germany (daily commute possible)

Phone: (+49) 0172 754 6835 **Email:** raval.varun@stud.hs-fresenius.de

LinkedIn: [linkedin.com/in/varunraval](https://www.linkedin.com/in/varunraval) **GitHub:** github.com/ravalvarun-SAP

Availability: From April 2026, full-time internship

Work authorization: Eligible to work as student in Germany

Languages: English (fluent), German (B1 – actively improving)

PROFILE / TARGET FOCUS

M.Sc. SAP Engineering & Analytics student with 1.5+ years at SAP Walldorf, building a focused profile in AI-enhanced UI applications on SAP BTP: SAP UI5/Fiori and Angular frontends, CAP (Node.js) services and data/AI backends using Python, SAP HANA Cloud and SAP Analytics Cloud (SAC). My Master's program is run in close cooperation with SAP and prepares students specifically for SAP roles, with modules on SAP BTP & Integration, S/4HANA ABAP/CA, SAP UI5/Fiori, SAC and SAP-aligned research projects. Through faculty and sessions with SAP BTP leadership (e.g. Erik Bartmann) I align my projects with real BTP use cases, especially in internal tools and analytics for SAP teams. I combine a design background (M.Des. Communication Design) with strong engineering skills, allowing me to build interfaces that are both technically robust and user-friendly.

KEY COMPETENCIES

Frontend & UX: Angular, SAP UI5/Fiori, JavaScript (ES6+), TypeScript, responsive layouts, input validation, error handling, UX thinking from design degree.

Backend & BTP: SAP BTP, CAP (Node.js), OData/REST APIs, SAP HANA Cloud, basic ABAP (RAP, CDS, AMDP).

AI & Automation: Python (pandas, NumPy), basic ML (classification, anomaly detection), SAC time-series forecasting, LLM integration mindset (LangChain/LangGraph-style flows).

Data & Analytics: SAP Analytics Cloud (multi-page stories, KPIs, drilldowns, forecast views), data modeling in HANA, data quality checks.

Collaboration: 1.5+ years in SAP teams (Services Sales, Non-Commercial Licensing, Transformation Advisory Center), Jira/Agile, stakeholder communication, professional documentation.

EDUCATION

Master of Science – SAP Engineering and Analytics (SAP-aligned program) Oct 2025 – Sep 2027 (Currently Enrolled)

Hochschule Fresenius, Heidelberg, Germany

Selected coursework: Data Science / AI Fundamentals; SAP BTP & Integration; SAP UI5/Fiori; SAP Analytics Cloud; S/4HANA ABAP/CA; Business Process Management.

Master of Design – Communication Design

2015 – 2018

MIT Institute of Design, Pune, India

Bachelor of Engineering – Computer Engineering

2010 – 2013

Ganpat University, India

TECHNICAL SKILLS (FOCUS AREAS)

Frontend & UI: Angular (components, services, reactive forms, basic routing); SAP UI5/Fiori, MVC architecture, data binding, OData consumption, chart libraries; JavaScript (ES6+), TypeScript, HTML5, CSS3, responsive design, error handling, input validation.

Backend, BTP & Integration: SAP BTP, CAP (Node.js), OData V4 services, HTTP/JSON; SAP HANA Cloud (table design, SQL, calculation views); basic ABAP (RAP, CDS, AMDP) and SAP S/4HANA context.

AI, Data & Automation: Python (pandas, NumPy) for data cleaning, validation, EDA and KPI

recomputation; basic ML concepts (classification, anomaly detection) and SAC forecasting; LLM/AI integration mindset (LangChain/LangGraph-style toolchains, prompt-driven workflows).

DevOps & Productivity: Git/GitHub (feature branching, pull requests); SAP Business Application Studio, SAP Web IDE, VS Code, Eclipse ADT, Chrome DevTools; Jira, SharePoint, MS Office, Figma, Adobe Creative Suite.

PROJECTS (MOST RELEVANT)

AI-Assisted UI Prototype (Angular + LLM Workflow)

Ongoing

Angular, JavaScript/TypeScript, LLM orchestration mindset

Designed and implemented a prototype UI where users can submit business questions and receive AI-generated guidance based on structured data and predefined flows. Built Angular components and services for prompt capture, result display and basic state handling, applying a pipeline mindset (separating prompt templates, tools and response handling) to keep the integration maintainable and extensible.

RISE-Style Retail Analytics End-to-End Pipeline on SAP BTP

Feb 2026 – Ongoing

SAP BTP (HANA Cloud, CAP Node.js, SAC) + Python

Designed an end-to-end analytics blueprint: loaded 1,000 global sales records into SAP HANA Cloud (SALES1000), fixed date formats via Python/pandas and created calculation views (CVSALESOVERVIEW, CVCHANNELANALYSIS, CVPROFITTREND, CVSALESVSINVENTORY) for KPIs and trends. Exposed data using CAP Node.js OData V4 services and designed a 4-page SAC story (global overview, product/channel, profitability, time & inventory) with live connection and forecast views, following an analyst methodology (5W+1H, 3-second rule).

SAC – End-to-End Sales Analytics Product

Jan 2026

SAP Analytics Cloud

Built a multi-page SAC story on 1,000+ sales records with executive KPIs and drilldowns by region, product and sales channel (online/offline). Implemented calculated measures (Profit Margin % and cost ratios), Linked Analysis and filters; performed data profiling on 14 dimensions across 7 regions to ensure 100% data completeness and zero-error reporting, and added a simple forecast to demonstrate AI-style support for management steering.

SAP UI5 – Salary & HR Management and Data Visualization

Oct 2025 – Present

SAP UI5, JavaScript (ES6+), OData, Fiori

Developing a full-stack HR web application using SAP UI5/Fiori principles, including time tracking, salary calculation with overtime, benefits management and advance payment tracking. Implemented MVC architecture, OData service consumption from S/4HANA, real-time UI5 chart dashboards, comprehensive input validation and error messages, responsive layouts and Git-based feature branching.

Retail Sales Data Cleaning Automation Pipeline

Jan 2026

Python, Jupyter Notebook, pandas

Created an automated Python pipeline for messy retail datasets: type checks, missing value handling, duplicate removal, KPI recalculation with logging and small test datasets for verification. Reduced manual preparation time by ~80% and experimented with simple anomaly detection as a first step towards AI-supported data quality checks.

WORK EXPERIENCE – SAP (WALLDORF, GERMANY)

Communication & Production Specialist

Oct 2024 – Mar 2025

SAP – Transformation Advisory Center MEE @ Immersive Experience Studio (IX Studio), Walldorf

Supported transformation advisory sessions for the Middle and Eastern Europe region by preparing high-quality digital assets and session materials. Coordinated feedback and changes with advisory leads and technical experts, tracked updates via Jira and documented requirements and decisions so that content could be reused consistently across engagements.

Digital Assets Curator and Communication Expert

Jun 2024 – Oct 2024

SAP – Non-Commercial Licensing, Walldorf

Managed digital asset curation and non-commercial licensing checks for SAP communication projects, ensuring compliance with IP and usage guidelines. Improved asset workflows through clearer structure, naming and status tracking for internal stakeholders.

Content and Communication Expert

Aug 2023 – Jun 2024

SAP – Demand Management, Services Sales MEE @ MME Services Sales DemGen, Walldorf

Created and maintained content for Services Sales initiatives across MEE, supporting demand generation and regional stakeholders. Worked in agile sprints using Jira, gathered feedback from sales and management and ensured quality and consistency before distribution.

RESEARCH & AI ACTIVITIES

SAP User Research – Joule AI Integration Study

Nov 2025 – Jan 2026

Hochschule Fresenius & SAP Walldorf/Frankfurt

Participated in SAP events on the SAP Joule AI assistant, conducted guided user interviews with customers and synthesized qualitative findings into structured summaries for stakeholders, focusing on adoption challenges and UX.

"SAP Fiori 2.0 and SAPUI5: Enhancing Enterprise User Experience" – Master's Research

Jan 2026

Analysed SAP's UX strategy, Fiori 2.0 principles and SAPUI5 architecture, connecting UX improvements to productivity, adoption and perceived quality.

"Migration from SAP ECC to SAP S/4HANA: Business Perspectives and Case Studies" – Master's Research

Jan 2026

Explored business drivers, risks and change management aspects of ECC-to-S/4HANA migrations, relating them to advisory services and the intelligent enterprise vision.

CERTIFICATIONS / TRAINING

S/4HANA ABAP/CA Training

June 2025

Intensive training in RAP, CDS, AMDP and ABAP Development Tools (ADT); error handling, debugging and optimization in S/4HANA.

SAP Analytics Cloud (SAC)

Project-based proof

Proficiency demonstrated through the end-to-end SAC sales analytics product and RISE pipeline dashboards.
